

Logi Trans

WASTE MANAGEMENT STATEMENT

**Logi Trans AS (LT) is certified by ISO14001 and OHSAS18001 standards.
LT is committed to the protection and enhancement of the environment.
This waste management policy statement shall apply throughout the LT organisation.
It shall apply to all LT projects, locations and working sites, applying the following.**

Logi Trans AS (LT) shall, as far as is reasonably practical undertake process and production operations in a manner which will minimise any risk to the environment and operate a waste management policy as a part of its Q&HSE Management System.

Any contractor or sub-contractor working at the LT location shall be subject to the LT waste management system requirements, and shall inform LT in a good time of their waste disposal requirements.

LT management shall oversee all waste disposal operations.

Waste shall only be sent to disposal facilities designated or agreed by LT. The storage and disposal facilities for all identified wastes shall be specified. Wastes shall be stored in designated containers which shall be demonstrated to be fit for purpose.

Incompatible wastes, in particular hazardous wastes shall be physically separated and shall not be mixed. Appropriate storage areas shall be provided for waste containers prior to transfer to disposal facilities. Storage area shall be defined and specified on a site or facility plan.

All waste containers shall be properly and clearly labelled.

Manual handling of waste containers shall be minimised and wherever practicable waste shall be transported on pallets.

Waste shall be collected and transported from LT sites or facilities in appropriate vehicle to the specified disposal site.

Training and developing employees to conduct their work in a manner which will contribute in achieving the company's policy and objectives.
